IMPORTANT NOTICE!

for Shasta Pool Lifetime Warranty and Extended Equipment Warranty Policy Holders!

ARIZONA SWIMMING POOL FILTRATION PUMP REPLACEMENT LAW FOR 2012

As of January 1, 2012, Arizona will begin enforcing the ARS 44:1375.02 energy bill. This bill requires that all swimming pool pump/motors (when requiring repair or any type replacement) be upgraded to an APS or SRP utility approved energy efficient pump. This law means you cannot simply replace a portion of the total pump/motor assembly. The law specifically states you MUST upgrade to an energy savings 2-speed or variable speed pump/motor combination that has been approved by APS or SRP in Arizona.

POOLS THAT ARE NOT AFFECTED

- Existing motor/pumps that are still under the original manufacturers warranty
- Pool motors/pumps not part of the filtration system and are used as a therapy booster pump, water feature pump or any other function other than the pool or spa filtration
- Pools under the original Registrar of Contractors 2 year warranty period that were built prior to 2012 and still have their original manufacturer's equipment warranty in affect

How the ARS 44.1375.02-12B Affects the Lifetime and EW Warranty

Code changes requiring that you upgrade to the new equipment standard are not covered by the Lifetime or Extended Equipment Protection plans. However, it is our desire to assist you in complying with these new state requirements by offering you a substantial savings over our normally installed pricing. The policy holders of these plans who comply with the new provisions will continue to have coverage on the upgraded pump/motor combination through the term of their policy coverage.

Special Pricing for LIFETIME & EW Policy Holders

BENEFITS OF UPGRADING

- You receive a \$200 REBATE courtesy of APS or SRP that is deducted from the install
- You see IMMEDIATE SAVINGS on your next monthly pool motor electric usage...
- Better efficiency and noise reduction from day 1...
- You maintain the coverage of your motor/pump upgrade through the existing warranty policy you already have in effect. NO one else can offer you this savings other than Shasta Pool Repair!

Variable Speed Pumps are the most efficient available!
